| Hazards not otherwise<br>classified                        | : None known.  |  |  |  |  |

# Section 3. Composition/information on ingredients

#### Substance/mixture

#### **Product code**

: Mixture

: 53-C 055 (3.78 L), 53-C 057 (20 L)

| Ingredient name                         | %       | CAS number |
|---|---------|------------|
| 2-Phenoxyethanol                        | 1 - 5   | 122-99-6   |
| Sulfonic acids, petroleum, sodium salts | 0.1 - 1 | 68608-26-4 |

United States: The exact percentage (concentration) in the composition has been withheld as a trade secret in accordance with paragraph (i) of §1910.1200.

Canada: The exact percentage (concentration) in the composition has been withheld as a trade secret in accordance with the amended HPR as of April 2018.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

#### Description of necessary first aid measures

| Eye contact  | : | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Continue to rinse for at least 20 minutes. Get medical attention.   |
|--------------|---|--|
| Inhalation   | • | Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately.  |
| Skin contact | : | Flush contaminated skin with plenty of water. Get medical attention if symptoms occur.   |
| Ingestion    | : | Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. |

#### Most important symptoms/effects, acute and delayed

| Potential acute health effects | <u>s</u> |   |
|--------------------------------|----------|---|
| Eye contact                    | :        | No known significant effects or critical hazards. |
| Inhalation                     | 1        | No known significant effects or critical hazards. |
| Skin contact                   | 1        | No known significant effects or critical hazards. |
| Ingestion                      | 1        | No known significant effects or critical hazards. |
| Over-exposure signs/symptoms   |          |   |
| Eye contact                    | :        | No known significant effects or critical hazards. |
| Inhalation                     | :        | No known significant effects or critical hazards. |
| Skin contact                   | 1        | No known significant effects or critical hazards. |
| Ingestion                      | ;        | No known significant effects or critical hazards. |

#### Indication of immediate medical attention and special treatment needed, if necessary

**Notes to physician** : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

### Section 4. First aid measures

Specific treatments Protection of first-aiders : No specific treatment.

: No action shall be taken involving any personal risk or without suitable training.

See toxicological information (Section 11)

## Section 5. Fire-fighting measures

| Extinguishing media                               |   |
|---|---|
| Suitable extinguishing media                      | : In case of fire, use foam, dry chemical or carbon dioxide.  |
| Unsuitable extinguishing media                    | : None known.   |
| Specific hazards arising from the chemical        | : No specific fire or explosion hazard.   |
| Hazardous thermal decomposition products          | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>sulfur oxides<br>metal oxide/oxides                             |
| Special protective actions for fire-fighters      | : No special measures are required.   |
| Special protective<br>equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. |

# Section 6. Accidental release measures

| Personal precautions, protect  | <u>tiv</u> | e equipment and emergency procedures  |
|--------------------------------|------------|---|
| For non-emergency<br>personnel | :          | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Put on appropriate personal<br>protective equipment.  |
| For emergency responders       | :          | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| Environmental precautions      | :          | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air).   |
| Methods and materials for co   | ont        | ainment and cleaning up   |
| Spill                          | :          | Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a |

information and Section 13 for waste disposal.

licensed waste disposal contractor. Note: see Section 1 for emergency contact

# Section 7. Handling and storage

|  | _   |   |
|--|---|---|
| Precautions for safe handlin                                       |   |   |
| Protective measures  | Put on appropriate personal protective equipment (see Section 8).   |   |
| Advice on general occupational hygiene                             | Eating, drinking and smoking should be prohibited in areas where this material handled, stored and processed. Workers should wash hands and face before drinking and smoking. See also Section 8 for additional information on hygiene measures. Remove contaminated clothing and protective equipment before ereating areas.   | eating,<br>e                              |
| Conditions for safe storage,<br>including any<br>incompatibilities | Store in accordance with local regulations. Store in original container protected direct sunlight in a dry, cool and well-ventilated area, away from incompatible r (see Section 10) and food and drink. Keep container tightly closed and sealed ready for use. Containers that have been opened must be carefully resealed a upright to prevent leakage. Do not store in unlabeled containers. Use appropri containment to avoid environmental contamination. See Section 10 for incompatient materials before handling or use. | materials<br>  until<br>and kept<br>riate |

# Section 8. Exposure controls/personal protection

#### **Control parameters**

**United States** 

#### **Occupational exposure limits**

| Ingredient name | Exposure limits |
|-----------------|-----------------|
|                 | None.<br>None.  |

#### Canada

#### **Occupational exposure limits**

| Ingredient name  | Exposure limits   |
|------------------|---|
| 2-Phenoxyethanol | CA Ontario Provincial (Canada, 7/2015). Absorbed through skin.<br>TWA: 141 mg/m <sup>3</sup> 8 hours.<br>TWA: 25 ppm 8 hours. |

| Appropriate engineering<br>controls | Ensure adequate ventilation. No personal respiratory protective equipment normally required.   |  |
|-------------------------------------|--|--|
| Environmental exposure controls     | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation.   |  |
| Individual protection measur        |  |  |
| Hygiene measures                    | Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing.  |  |
| Eye/face protection                 | Safety eyewear complying with an approved standard should be used when a risk<br>assessment indicates this is necessary to avoid exposure to liquid splashes, mists,<br>gases or dusts. If contact is possible, the following protection should be worn, unless<br>the assessment indicates a higher degree of protection: safety glasses with side-shie |  |

#### **Skin protection**

# Section 8. Exposure controls/personal protection

| •                      | · · ·  |
|------------------------|--|
| Hand protection        | : Chemical-resistant, impervious gloves complying with an approved standard should be<br>worn at all times when handling chemical products if a risk assessment indicates this is<br>necessary. Considering the parameters specified by the glove manufacturer, check<br>during use that the gloves are still retaining their protective properties. It should be<br>noted that the time to breakthrough for any glove material may be different for different<br>glove manufacturers. In the case of mixtures, consisting of several substances, the<br>protection time of the gloves cannot be accurately estimated.<br>Recommended: Nitrile gloves 0.4 mm thick, permeation time 480 minutes. |
| Body protection        | <ul> <li>Personal protective equipment for the body should be selected based on the task being<br/>performed and the risks involved and should be approved by a specialist before<br/>handling this product.</li> </ul>  |
| Other skin protection  | <ul> <li>Appropriate footwear and any additional skin protection measures should be selected<br/>based on the task being performed and the risks involved and should be approved by a<br/>specialist before handling this product.</li> </ul>  |
| Respiratory protection | : Use a NIOSH/MSHA approved respirator if there is a risk of exposure at levels exceeding the exposure limits. Advice should be sought from respiratory protection specialists.  |

# Section 9. Physical and chemical properties

| <u>Appearance</u>                            |   |   |
|--|---|---|
| Physical state                               | : | Liquid.   |
| Color  | : | Blue.   |
| Odor   | 1 | Mineral oil like.   |
| Odor threshold                               | 1 | Not available.  |
| рН   | : | 8.5 to 9.5  |
| Melting point                                | 1 | 0°C (32°F)  |
| Boiling point                                | 1 | >100°C (>212°F)   |
| Flash point                                  | 1 | Closed cup: 150°C (302°F)                                     |
| Evaporation rate                             | : | Not available.  |
| Flammability (solid, gas)                    | 1 | Not available.  |
| Lower and upper explosive (flammable) limits | 1 | Lower: 0.6%<br>Upper: 6.5%                                    |
| Vapor pressure                               | : | Not available.  |
| Vapor density                                | : | Not available.  |
| Relative density                             | : | 0.97 g/ml @ 20°C (68°F)                                       |
| Solubility                                   | : | Soluble in the following materials: cold water and hot water. |
| Partition coefficient: n-<br>octanol/water   | 1 | Not available.  |
| Auto-ignition temperature                    | 1 | Not available.  |
| Decomposition temperature                    | : | Not available.  |
| Viscosity                                    | 1 | Not available.  |
| Flow time (ISO 2431)                         | 1 | Not available.  |
| VOC content                                  | : | 0% (w/w)  |
|  |   |   |

# Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.           |
|------------------------------------|--|
| Chemical stability                 | : The product is stable.   |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.                      |
| Conditions to avoid                | : No specific data.  |
| Incompatible materials             | : Reactive or incompatible with the following materials: oxidizing materials.                          |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

: No known significant effects or critical hazards.

### Section 13. Disposal considerations

**Disposal methods** : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

# Section 14. Transport information

|                               | DOT Classification | TDG Classification | IMDG           | ΙΑΤΑ           |

#### **SARA 313**

|                                 | Product name     | CAS number |
|---------------------------------|------------------|------------|
| Form R - Reporting requirements | 2-Phenoxyethanol | 122-99-6   |
| Supplier notification           | 2-Phenoxyethanol | 122-99-6   |

SARA 313 notifications must not be detached from the SDS and any copying and redistribution of the SDS shall include copying and redistribution of the notice attached to copies of the SDS subsequently redistributed.

**State regulations** 

| Massachusetts              | : The following components are listed: Distillates (petroleum), hydrotreated heavy<br>naphthenic                                      |
|----------------------------|---|
| New York                   | : None of the components are listed.  |
| New Jersey                 | <ul> <li>The following components are listed: Distillates (petroleum), hydrotreated heavy<br/>naphthenic; 2-Phenoxyethanol</li> </ul> |
| Pennsylvania               | : None of the components are listed.  |
| <u>California Prop. 65</u> |   |

MARNING: This product can expose you to chemicals including Nitrilotriacetic acid, which is known to the State of California to cause cancer, and Methanol, which is known to the State of California to cause birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

#### **Canada Canadian lists**

## Section 15. Regulatory information

Canadian NPRI

- : None of the components are listed.
- **CEPA Toxic substances** 
  - es : None of the components are listed.
- Canada inventory (DSL
- NDSL)
- : All components are listed or exempted.

# Section 16. Other information

#### Procedure used to derive the classification

|                          | Classification | Justification |
|--------------------------|----------------|---------------|
| Not classified.          |                |               |
| <u>History</u>           |                |               |
| Date of issue mm/dd/yyyy | : 09/30/2018   |               |
| Date of previous issue   | : 08/30/2017   |               |
| Version                  | : 3            |               |
