

BRUSH AWAY OPERATIONAL COSTS

POWER BRUSHES

THE SAFEST, LONGEST LASTING, BEST PERFORMANCE POWER BRUSHES ON THE MARKET

WALTER power brushes have been engineered to provide the highest performance and productivity.

- **Superior brush design** means every knot is perfectly balanced for minimal vibration and maximum comfort.
- **High quality industry grade materials** for the longest life, which translates into less brushes used.
- **Safety features** internal steel plate holds wires securely in place even under extreme pressure for maximum strength. This allows end users to achieve their desired finish safely. All power brushes meet ANSI B7.1 safety standards.

Select the right power brush for the job

Power tool used	FLAT CLEANING		ANGLE CLEANING		VERTICAL CLEANING	
Material	 STEEL	 STAINLESS STEEL, ALUMINUM AND N.F.	 STEEL	 STAINLESS STEEL, ALUMINUM AND N.F.	 STEEL	 STAINLESS STEEL, ALUMINUM AND N.F.
Wire brush hub colour	 ORANGE	 BLUE	 ORANGE	 BLUE	 ORANGE	 BLUE
Wire brush selection	Wire Cup (13-D, 13-F, 13-G)	Wire Cup (13-D, 13-G)	Saucer Cup (13-H)		Wire Wheel (13-J, 13-K, 13-L, 13-B) Mounted Brush (13-C)	

Factor to consider in brushing

Wire construction

CRIMPED WIRE

Perfect for light surface cleaning, rust and paint removal.

STRINGER BEAD

Stringer bead brushes are extra narrow to clean in tight areas such as between weld passes in pipe fitting.

KNOT-TWISTED

For heavy-duty brushing such as: deburring, weld edge cleaning, removal of scale, spatter, heavy rust and corrosion, etc.

DOUBLE KNOT-TWISTED

Helps end users work 2x faster on large surfaces. Requires less torque from the power tool being used and delivers the same efficiency.

PRO TIP:

Use with a variable speed grinder (lower RPM) to extend brush life!

Ask your Territory Manager about our full lineup and full sku listing.

	WIRE CUP BRUSHES	SAUCER CUP BRUSHES
Application	High-performance brushing on large flat surfaces	For hard-to-reach areas: inside corners, edges and contours
Power tool	For angle grinders	For angle grinders
Wire construction	Crimped, Knot-Twisted, Knot-Twisted with ring, Double Knot-Twisted with ring	Crimped, Knot-Twisted
Material compatibility	Both blue and orange coloured hubs available	Both blue and orange coloured hubs available
Wire size	0.0118", 0.015", 0.020", 0.035"	0.012", 0.015", 0.020"
Series	13-D, 13-E, 13-F, 13-G	13-H

KNOT-TWISTED WITH RING

Knot-Twisted with ring controls flaring to extend brush life. Once worn down to the ring, it can be removed to expose more wire for extra brush life.

Contact a WALTER Territory Manager to create productivity reports or launch a Bucket Program to demonstrate how WALTER can lower total cost of ownership with its metal working solutions.

	MOUNTED WIRE BRUSHES *	WIRE WHEEL BRUSHES
Application	For general surface cleaning, deburring, corrosion and rust removal	Commonly used to remove paint, rust and corrosion, for light deburring and similar cleaning jobs
Power tool	For drill / die grinders	For angle grinders, bench and pedestal grinders
Wire construction	Crimped, Knot-Twisted	Stringer Bead, Knot-Twisted, Crimped
Material compatibility	Both blue and orange coloured hubs available	Both blue and orange coloured hubs available
Wire size	0.008", 0.010", 0.0118", 0.014", 0.020"	0.0118", 0.020"
Series	13-C	13-J, 13-K, 13-L, 13-B

* Mounted Wire Brushes are available in types: Straight, Conical, Wheel, Spherical and Cup.
