OXWELD C-67

[OVERVIEW](#)

[DOCUMENTS AND SPECS](#)

[ORDERING INFORMATION](#)

ESAB's rugged C-67 cutting torch works with any fuel gas except acetylene. Its long torch provides outstanding capacity and high cutting speeds using ESAB's high-speed nozzles.

The torch's precision injector orifice makes torch balancing easier in multi-torch applications. A cutting oxygen flip-valve allows for quick manual shut-off of the cutting oxygen.

The C-67 comes equipped with one injector installed.

Features

For use with any fuel gas except acetylene

Supplied with one injector installed (injector determines capacity)

3-hose connections with separate cutting oxygen for improved performance

Industries

Industrial and General Fabrication

Structural Steel Fabrication

Repair and Maintenance

Light Fabrication
