HP 3530

Description: High Flow Single Gauge Pipeline Regulator

A brass barstock in-line manifold regulator for pipeline and other applications up to 3000 PSIG inlet pressure.

Typical Application: High Flow Non-corrosive high flow gas applications High purity gas applications Research sample system gases Process analyzer gases Bulk gas distribution systems Laser gas systems Emission monitoring systems gases

Model HP-3530-250

DETAILS

Features:

- 2 3/4" stainless steel diaphragm eliminates contamination from diffusion or outgassing
- 1/2" FNPT inlet and outlet
- One piece encapsulated seat design includes a sintered filter to protect the seat from particulate contamination
- 2 1/2" brass dual scale gauge (psi/bar)
- Maximum inlet 3000 PSIG (500 PSIG for 15 PSIG model)
- Four port configuration, one high pressure and three low pressure
- Self reseating internal relief valve

Stages	Gauges	Gas Purity	Certifications
Single	psi?pKa	Grade 5.0 (99.9999)	CGA E-4
