Price Changes

Dear Valued Customer,

As you may already be aware steel prices continue to rise at unprecedented rates - rising 300% since August 2020. Since February 2021 alone we have received 3 separate price increases from each of our major vendors. Although we have taken the greatest care to offset as much of these increases as possible, effective May 31 2021 we will be implementing a 6% general price increase on all welding equipment, wires electrodes and supplies, a \$7.00 increase on acetylene prices (due to acetone shortages and calcium carbide increases) a \$0.50 increase on all propane cylinder rentals, a \$1.00 increase on all steel cylinder and cage rental rates and a \$10.00 increase on all liquid cylinders, bulk packs rental rates.

Propane and ALL other gas prices are NOT AFFECTED and will remain UNCHANGED.

If you should have any questions about this price change, please do not hesitate to contact myself or a member of my accounting team at any time.

Thank you,

Richard Stangl
